Batuhan Korur Full-stack Developer

bkorur95@gmail.com   03 August 1995   British & Turkish Citizen

+90 541 314 7898   Istanbul, Turkey

Full-Stack Developer specializing in TypeScript, React, Vue, Node, Bun, and Laravel. My expertise lies in creating maintainable and scalable full-stack applications. On the backend, I focus on building RESTful APIs, GraphQL, web sockets, and integrating microservices, along with working with both SQL and NoSQL databases.

Tech Stack

Front-end Technologies

TS Typescript	JS Javascript	React / Next.js	Vue / Nuxt.js
Svelte	Capacitor / Ionic	Redux / Pinia	Storybook

Back-end Technologies

Node / Express	Bun / Hono	Laravel / PHP	SQL
MongoDB	Redis	GraphQL	

Development Toolbox

Git	Linux	Docker	AWS
Firebase	OpenAPI	Vercel	

Skills

OOP & Component Based Programming	Web Sockets & API-Driven Software
Serverless/Microservice Architecture	GraphQL Implementation
State Management Patterns	Progressive Web Applications (PWA)
Unit & Integration Testing (Vitest, Jest)	E2E Testing (Playwright, Cypress)
Scalable Frontend Architecture	Design Systems and UX

Work History

Dedecta | Lead Frontend Developer   Istanbul, 09/2024 - Present

I am the lead front-end developer at Dedecta, overseeing the front-end team and collaborating with the backend team to integrate features for data analysis applications. I focus on optimizing performance and implementing best practices to ensure a smooth user experience, as these applications can often be laggy and error-prone. My goal is to enable users to navigate and analyze data efficiently.

Reachin | Co-Founder & Full Stack Developer   Istanbul, 06/2023 - 06/2024

Co-founded a startup and developed a hybrid mobile app using Capacitor with React, with a robust backend service. Successfully created a prototype to secure funding in our initial investment round.

- For the backend service, I developed a RESTful API using Laravel and PHP, designed for consumption by the mobile application. I integrated multiple external services, including Stripe for payment processing and Onyx for continous data collection.

- Developed a SPA using Next.js to monitor various business operations. This application enables admin users to send global app notifications, manage users, operate finances and handle various business operations.

Brickhunter | Full Stack Developer   London, 05/2022 - 01/2024

As a full-stack developer, I was responsible for re-designing the customer-facing e-commerce platform and refactoring a legacy codebase with new and modern technologies.

- We rebuilt the customer-facing web application which improved loading speed and SEO scores, along with integrating a headless content management system via Storyblok.

- Worked on refactoring and building new modules to the internal business application, improving workflow efficiency.

| **Work History** | **Universal Packing Specialists** \| Full Stack Developer | London, 02/2020 - 03/2022 |

UPS is a British box-making factory. I joined the company to work on internal web application software, transforming various business operations into a digital workflow.

- Developed a comprehensive single-page application with features ranging from customer management, quote generation, invoice management, and order and delivery tracking.
- Contributed to developing an in-app messaging system, enhancing internal communication within the business for more effective and efficient operations.
- Created a mobile application for couriers to easily manage delivery statuses, automatically generate and print PDF documents, and optimize delivery routes.

Okami Creative \| Founder / Developer   Istanbul, 05/2015 - 01/2020

Established an agency focused on creating interactive and engaging business applications, working on a diverse range of projects for various companies

- Developed a web and mobile application for valet parking businesses to track and manage car parking easily through a mobile app and a web application backend to view various business metrics.
- Developed a digital restaurant menu for tablets, enhancing the customer experience to a more luxurious level while providing a streamlined process for updating menu items, boosting business agility and efficiency.
- Created comprehensive front-end UI libraries for software companies using both Vue and React, collaborating closely with my UX designer co-founder.
- Created a digital product called the Krom Wireframe Kit, a powerful tool based on the Atomic Design System that aims to significantly improve the speed and quality of wireframe for UI/UX designers.

| **Education** | **Istanbul University** | 2014 - 2020 |

Bachelor of Arts (BA) in Linguistics
Board Member of Istanbul University Photography Club (2016 - 2018)
